DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4, 30, and 32-33 are rejected under 35 U.S.C. 102(b) as being anticipated by Minato (JP 4-85562). The image forming apparatus by Minato comprises a photosensitive body on which a photosensitive layer is provided; and a charger opposed to the photosensitive body for charging a surface of the photosensitive body, wherein an interval between the surface of the photosensitive body and the charger is narrower on a first side of the photosensitive body than on a second side thereof (Figure 8). The first and second sides are the end portions of the charging device.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 2852

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claim 37 is rejected under 35 U.S.C. 103(a) as being unpatentable over Minato in view of Kobayashi et al. Minato does not teach photosensitive dipping.

Kobayashi et al. (JP2003-156864A) teaches photosensitive dipping. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the teachings of Kobayashi et al. with the image forming device of Minato to obtain uniform coating of the photosensitive member (Kobayashi et al.; purpose: lines 1-9).

Allowable Subject Matter

6. Claims 5-10, 31, 34-36, and 38-40 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Claims 11-29 are allowed.
